

New JAGGAER User Interface

All Spend, All Processes, One Platform: Now with an improved User Experience

Introducing the New JAGGAER User Interface

As part of our JAGGAER ONE unified platform strategy, the User Experience team is excited to introduce a new User Interface that provides a common user experience across all JAGGAER ONE modules.

Benefits of the new UI include:

- More usable screen space
- A more intuitive user experience across all of our solutions
- A more aesthetically pleasing user experience

What You Will See in the New UI

Our primary goal with the new UI is to align the look & feel across all JAGGAER ONE modules, from Source-to-Contract to Procure-to-Pay and Supply Chain Management.

The initial focus is on the major elements displayed on all solutions, a user's interaction with those elements, and providing a more clean and open workspace.

The most visible changes include:

- 1. New Sidebar Navigation (incl. Configurable Colors)**
- 2. Standardization of Solution Icons (in Navigation)**
- 3. A more streamlined Header**

Sidebar Navigation Themes

Dark and light themes with configurable color choices provide options for supporting your brand colors

Solution Icons

Existing Icons: Variation across solutions

			Home
			Dashboard
			Supplier Management
			Reports
			Documents
			Sourcing
			Admin
			Project
			Contracts
			Shop

Standardized across
all solutions

New Icons: Standard across solutions

	Home
	Dashboard
	Supplier Management
	Reports
	Documents
	Sourcing
	Admin
	Project
	Contracts
	Shop

Streamlined Header

Improving overall aesthetic and expanding usable workspace

Configurable Color Elements within Themes: Logo, Links, Navigation

Examples

Existing User Interface

The existing user interface features a purple sidebar on the left with navigation links: Home, Shop, Documents, Contracts, Accounts Payable, Suppliers, Inventory, Reporting, Tools, Admin, and Setup. The main content area includes a search bar, a breadcrumb trail (Shop > Shopping > Shopping Home > Home/Shop), and a search filter dropdown. Below the search bar, there are several sections: 'NEW AMAZON PUNCH-OUT CATALOG' with a notice about the catalog's availability; an 'IMPORTANT' section with a list of ProCard rules; 'TSM - Banner ID Information' with links for verification and search; 'Contact BTU Supplier Management with any questions:' with an email address; 'New Contract Information' with links for guidelines; 'Materials Management Forms' with links for authorization and payment requests; and 'BTU Student Stores Catalog'.

New User Interface

The new user interface features a purple sidebar on the left with navigation icons: Home, Shop, Documents, Contracts, Accounts Payable, Suppliers, Inventory, Reporting, Tools, Admin, and Setup. The main content area includes a search bar, a breadcrumb trail (Shop > Shopping > Shopping Home > Shopping Buyer), and a search filter dropdown. Below the search bar, there are several sections: 'NEW AMAZON PUNCH-OUT CATALOG' with a notice about the catalog's availability; an 'IMPORTANT' section with a list of ProCard rules; 'TSM - Banner ID Information' with links for verification and search; 'Contact BTU Supplier Management with any questions:' with an email address; 'New Contract Information' with links for guidelines; 'Materials Management Forms' with links for authorization and payment requests; and 'BTU Student Stores Catalog'.

Future UI Alignment

Additional UI elements are being considered for future upgrades and alignment across all JAGGAER solutions

1. **Typography**
2. **UI Elements (Buttons, Tabs, Checkboxes etc.)**
3. **Formfields, Lists...**

How will these changes affect my organization and users?

- More intuitive navigation through a clean & functional platform UI while supporting branding and color schemes (see examples)
- Standardization of Icons and workspace UI across all solutions
- In certain cases, changes from a banner to logo will be required to fit in the streamlined Header. Review and manage prior to or during UIT and Prep.

UI Rollout Timeline

- Formerly Indirect Modules – 19.2 Beta, 19.3 Beta, 20.1 Standard
- Formerly Advantage Modules – 19.3 Beta, 20.1 Standard
- Formerly Direct Modules – 19.3 Beta, 20.1 Standard
- Sourcing Optimizer is not included in this initial release of UI enhancements

You will be able to review the new UI beginning with the Beta releases shown above, and you can choose to adopt the new UI for all of your users with the 19.3 release. The UI changeover will take effect for all customers with the 20.1 release.

Please contact your JAGGAER Account Manager for more information or if you have any questions about the new JAGGAER UI.

A hand holding a pen is shown in a dark red, semi-transparent overlay. The background features a network diagram with yellow nodes and lines on a dark blue background, transitioning into a bright yellow area with red nodes and lines. The overall composition is modern and tech-oriented.

THANK YOU!
